Dear Hiring Manager,

I am Niteen Thakare, I have 3+ years of experience as Software Test Engineer in Investa Digital Technology, Mumbai, but currently I have been working for this company as work from home. I am looking for job change I saw there is opening for Associate QA Manual. So I decide apply for this opportunity Following are my skill.

Automation Testing: Java, Selenium, TestNG.

Manual Testing: System Functional testing, Mysql , Postman, SOAP AI.

I always pay roles and responsibilities while working in company.

Analyzing user stories, preparing test cases, review test cases, execute test cases. Participate in different types of testing such system and functional testing, regression testing, black box testing. Design and develop the automation script when needed. Detect and track software defect. Provide timely solution. Prepare test summary report. Apply quality Engineering principle throughout Agile product life cycle.

Please find my uploaded resume for your reference.

Looking forward for your response.

Thanks and Regards,
Niteen Thakare,
